I am a Data Science student at Telkom University in Bandung. I build practical skills in programming, computer systems, hardware, software development, and artificial intelligence. My path started with one year of Applied Physics at Sumatera Institute of Technology. That year gave me a strong quantitative base and trained me to solve problems step by step.

I learn by building. I develop personal projects in web and game development, including a real-time online photobooth web app. Each project teaches me how to plan features, test them with real users, and fix what breaks. I also study data skills through the Databased self-learning program, where I practice turning raw data into clear, useful results.

I also explore reverse engineering, which helps me understand how software and systems work from the inside. This habit makes me careful when I debug and analyze problems.

I want to join a team where I can contribute, learn from others, and grow. I bring curiosity, discipline, and a steady focus on finishing what I start.

Education Level

Yadika 5 High School - West Jakarta <i>Senior High School, Science Interest, 3.40/4.00</i> - Physics Project Partner - Merdeka Project Coordinator (Curriculum)	Jan 2023 - May 2025
Sumatera Institute of Technology - South Lampung <i>Ex-Undergraduate Majoring in Applied Physics</i>	Aug 2025 - Jun 2026
Telkom University - Bandung <i>Undergraduate Majoring in Data Science</i>	Jul 2026 - Jul 2031 (Expected)

Work Experiences

Telkom University Undergraduate Student's Project - Bandung, Indonesia <i>Developer</i> Building an interactive campus map website with a teammate. Users find classrooms, rooms, and facilities on one map. Plan the features and build the navigation system. Backend Developer	Jul 2026 - Present
Personal Project - Bandung, Indonesia <i>Full-Stack Developer</i> Building a real-time online photobooth web app for multiple users. Design the live connection between users and test it with real people. Fix bugs based on user feedback.	Dec 2025 - Present

Skills, Achievements & Other Experience

- Soft Skills:** Reverse Engineering, Microsoft Office, Programming
- Interest:** Database, Artificial Intelligence Models
- Projects:** (Ideas) Puzzle Interactive Website and Universal Dashboard website for Activities
